September 16, 2026

To Whom It May Concern:

Please allow this letter to serve as confirmation that AirSupply has completed Cybersecurity Maturity Model Certification (CMMC) Level 1 compliance.

AirSupply has implemented the 15 required CMMC Level 1 practices, which establish basic safeguarding measures including access control, identification and authentication, media protection, physical protection, system and communications protection, and system and information integrity.

AirSupply completed their self-assessment on September 16th, 2026, demonstrating compliance with CMMC Level 1 requirements.

The implementation of these foundational cybersecurity controls, along with the completion of the required documentation and assessment steps, confirms that AirSupply meets the CMMC Level 1 compliance requirements. CMMC Level 1 requires an annual self-assessment and affirmation, and AirSupply is positioned to maintain compliance on that cadence.

Sincerely,

Justin Beals
