AIRSUPPLY TOOLS

CAPABILITY STATEMENT

CORE COMPETENCIES

For over 20 years we have manufactured tool kits and 5S foam inserts for commercial, government, and manufacturing customers.

- **Deep discounts.** Being a government distributor enables us to provide exceptional service while providing deep discounts.
- **One-stop-shop.** In addition to being a full line industrial distributor we can provide customized kitting services including foam inserts, laser marking, custom tool manufacturing and storage solutions.
- **Innovation.** We own the patent on a unique tool storage system related to the US Navy's famous white box kits. Our shadowed background system reduces FOD and improves tool accountability. We support spares for all boxes in the fleet.
- **Smartbox.** Our latest innovation not only tracks tools automatically but allows reorder of broken/worn tools from the box directly. This step when coupled with a bpa/lta would save hundreds in processing costs per tool! Available for order Q4 2025.

PAST PERFORMANCE

- Stood up 7 new F18E Super Hornet squadrons concurrently with 100+ tool kits each with our famous white box kits, sewn tool pouches, and custom made tools per the tool control manual.
- Provide 100% of Navair compliant tool kits to the 3rd MAW including MCAS Miramar, MCAS Camp Pendleton, MCAS Yuma.

DIFFERENTIATORS

- ISO9001 certified. Rigorous QC and established process controls.
- Long history with solid financial stability.
- The only company with our patent that builds white box kits. We also manufacture custom tooling including F35 reamers, low rpm sets and sewn tool pouches.
- One-stop-shop capability, as a DoitBest industrial commercial store along with exclusive government relationships and manufacturing capabilities we are the only kitting company that can provide 100% complete tool kits. We build our tool kits with all major brands of tools and work closely with all Prime Vendors, 4PL contract holders, as well as commercial customers of all types.
